

Pattison Brothers, Mississippi River Terminal Process Verified Program

Program Name:

Pattison Brothers Identity Preserved (IP) Grain Quality Assurance Program

Program Requirements – “Process Points”:

Pattison Bros. IP Grain Quality Assurance Program offers:

1. Timely flow of market information to producers.
2. Identity Preserved grain shipments will be traceable and source verified.
3. Pattison Bros. will maintain the integrity, purity, and quality of Identity Preserved grains throughout the handling process.
4. Pattison Bros. Brand (PBB) soybeans offer:
 - a. Traceability from origin seed stock
 - b. Non-GMO purity tested genetics
 - c. Grain production monitored throughout growing season and reports issued to the sales customer.
 - d. Utilization of Pattison Bros. Identity Preserved Grain Process system for tracking producer's best management practices (i.e. clean farm equipment used in planting, harvesting, transportation, and storage).
